Cell Calcium (2000) **27** (6), 365–367
© 2000 Harcourt Publishers Ltd
doi: 10.1054/ceca.2000.0140, available online at http://www.idealibrary.com on IDEAL®

Subject index to Volume 27

A

Acetylcholine-induced calcium oscillations, in tracheal smooth muscle, 153
Adrenal (bovine) chromaffin cells, histamine evoked cytosolic Ca^{2+} elevations, 139
Apoptosis, TNFα-induced, in selective down-regulation of inositol 1,4,5-trisphosphate receptor, 315
ATPases, multiple plasma membrane, in pancreatic islet cells, 231
ATP, differential modulation of inositol 1,4,5-trisphosphate receptors, 257

B

Bone-matrix proteins, specific activation of calcium signals in prostate cancer cells (Review), 35
Brain, cyclic nucleotide-gated channels in (Review), 127
Buffering, rapid cytoplasmic calcium, estimate in single smooth muscle cell, 3

C

Cadmium influx in Madin-Darby kidney cells, stimulation by maitotoxin, 187
Caffeine, increases indo-1 fluorescence ratio in a Ca^{2+}-independent manner, 117
Calcium ATPases, multiple plasma membrane, in rat pancreatic islet cells, 231
Calcium binding, effects of Δ469 mutation, 309
Calcium buffering, rapid cytoplasmic, estimate in single smooth muscle cell, 3
Calcium channels
  activation, maitotoxin stimulates cadmium influx in Madin-Darby kidney cells, 187
  cyclic nucleotide-gated channels in non-sensory organs (Review), 127
Calcium concentration dynamic changes in neutrophil phagosomes, 353
  (intracellular) effects of norepinephrine and oscillating cells, 163
  mitochondrial, effects of cyclosporin A in hypoxic cardiomyocytes, 87
Calcium dynamics, progress in (Meeting report), 363
Calcium elevations
  (cytosolic) histamine evoked, in bovine adrenal chromaffin cells, 139
  effects on endoplasmic reticulum structure and function in HEK293 cells, 175
Calcium entry, store-operated, cell-to-cell variation in HEK293 cells, 61
Calcium homeostasis, endoplasmic reticulum, effects of nitric oxide, 107
Calcium imaging, (fast) GABAergic and glutamatergic activity, 25
Calcium indicators
  caffeine increases indo-1 fluorescence ratio in a Ca^{2+}-independent manner, 117
  chemical and physiological characterization of fluo-4 dyes, 97
  low-affinity, ionic selectivity of mag-Fura-2, Fura-2FF and BTC, 75
Calcium influx
  effects of sphingosine in HL-60 cells, 269
  P_{2Y}-mediated, inhibition by purinergic P_{2X} receptors in human microglia, 205
Calcium measurement, intracellular, with simultaneousnitric oxide measurement, 281
Calcium mobilization
  collagen-induced, characterization in bovine platelets, 53
  effects of sphingosine in HL-60 cells, 269
  in pancreatic β-cells permeabilized or not with digitonin or α-toxin, 43
Calcium oscillations
  acetylcholine-induced, in tracheal smooth muscle, 153
  nitric oxide-induced modulation in pulmonary vascular smooth muscle, 329
Calcium release
  Ca^{2+}-induced, modes of propagation in (bullfrog) sympathetic ganglion cells, 195
  influence of inositol polyphosphate binding proteins, in permeabilized HL-60 and T15 cells, 15
  in melanosomes from retinal pigment epithelium, 223
  spatiotemporal patterns (Meeting report), 363
Calcium signalling
  in prostate cancer cells, specific activation by bone-matrix proteins (Review), 35
  in sarcoplasmic reticulum, cytoplasm and mitochondria during activation of myocytes, 339
  synchronization within insulin-secreting pseudoislets, 287
Calcium stores, mobilization in pancreatic β-cells permeabilized or not with digitonin or α-toxin, 43
Calcium uptake, in melanosomes from retinal pigmentepithelium, 223
Calcium waves, intercellular, subcellular organization, 297
Calpain, selective down-regulation of inositol 1,4,5-trisphosphate receptor, 315
Cardiomyocytes, hypoxic, effects of cyclosporin A on mitochondrial $[Ca^{2+}]$, 87
Cartilage oligomeric matrix protein (COMP), Δ469 mutation and calcium binding, 309
Caspases, selective down-regulation of inositol 1,4,5-trisphosphate receptor, 315
β-Cells *see* Pancreatic islet cells, Pseudoislets
Collagen-induced calcium mobilization in bovine platelets, characterization, 53
Cyclic nucleotide-gated channels in non-sensory organs (Review), 127
Cyclosporin A, effects on cell recovery and mitochondrial $[Ca^{2+}]$ in hypoxic cardiomyocytes, 87

Cytoplasm, calcium signalling in, during activation of myocytes, 339
Cytoplasmic calcium
buffering (rapid), estimate in single smooth muscle cell, 3
elevated, effects on endoplasmic reticulum structure and function in HEK293 cells, 175
Cytosolic calcium elevations, histamine evoked, in bovine adrenal chromaffin cells, 139

D

Diazoxide, in metabolic, cationic and secretory response of islets to D-glucose, 213
Digitonin, permeabilized pancreatic β-cells, and mobilization of calcium stores, 43

E

Endoplasmic reticulum
effects of elevated Ca^{2+} and protein kinase C on structure and function in HEK293 cells, 175
effects of nitric oxide on calcium homeostasis, protein synthesis and energy metabolism, 107
Energy metabolism, endoplasmic reticulum, effects of nitric oxide, 107
Epithelial cells (HT29 colonic), G protein α-subunits mediate UTP responses, 247
Erratum, 125

F

Fluo-4 Ca^{2+}-indicator dyes, chemical and physiological characterization, 97
Fluorescent indicators
caffeine increases indo-1 fluorescence ratio in a Ca^{2+}-independent manner, 117
chemical and physiological characterization of fluo-4 dyes, 97
ionic selectivity of low-affinity ratiometric calcium indicators (mag-Fura-2, Fura-2FF and BTC), 75
Fura-2
ionic selectivity of low-affinity ratiometric calcium indicators (mag-Fura-2, Fura-2FF and BTC), 75
simultaneous measurement of intracellular calcium and nitric oxide, 281

G

GABAergic activity, fast calcium imaging of rat hippocampus, 25
Gap-junction uncouplers, synchronization of calcium signals within insulin-secreting pseudoislets, 287
D-Glucose, metabolic, cationic and secretory response of islets to, 213
Glutamatergic activity, fast calcium imaging of rat hippocampus, 25
G protein, α-subunits mediate UTP responses, 247

H

Heart, cyclic nucleotide-gated channels in (Review), 127
HEK293 cells
cell-to-cell variation in store-operated calcium entry in, 61
effects of elevated cytoplasmic Ca^{2+} and protein kinase C on endoplasmic reticulum structure and function in, 175
Hippocampus (rat), fast calcium imaging of GABAergic and glutamatergic activity, 25
Histamine evoked cytosolic Ca^{2+} elevations, in bovine adrenal chromaffin cells, 139
HL-60 cells
effects of sphingosine on calcium mobilization and influx, 269
inositol polyphosphate binding proteins and Ca^{2+} release in, 15
HT29 cells, G protein α-subunits mediate UTP responses, 247
Hypoxia, reoxygenation injury, effects of cyclosporin A on mitochondrial $[Ca^{2+}]$ in cardiomyocytes, 87

I

Inositol 1,4,5-trisphosphate
differential modulation of receptors by ATP, 257
expression and influence on Ca^{2+} release in permeabilized HL-60 and T15 cells, 15
selective down-regulation of receptor by caspases and calpain, 315
Inositol tetrakisphosphate receptors
influence on Ca^{2+} release in permeabilized HL-60 and T15 cells, 15
Insulin, synchronization of calcium signals within pseudoislets, 287
Ionic selectivity of low-affinity ratiometric calcium indicators (mag-Fura-2, Fura-2FF and BTC), 75
Islets *see* Pancreatic islet cells, Pseudoislets

K

K_{ATP} channel, effects of norepinephrine on $[Ca^{2+}]_i$ in oscillating/non-oscillating cells, 163

L

Liver, cyclic nucleotide-gated channels in (Review), 127

M

Madin-Darby kidney cells, maitotoxin stimulates cadmium influx, 187
Maitotoxin stimulates cadmium influx in Madin-Darby kidney cells, 187
Melanosomes, Ca^{2+} uptake, release and ryanodine binding in, 223
Microglia, activation of purinergic P_{2X} receptors inhibits P_{2Y}-mediated Ca^{2+} influx in, 205
Mitochondria
calcium signalling in, during activation of myocytes, 339
effects of cyclosporin A on $[Ca^{2+}]$ in hypoxic cardiomyocytes, 87
Myocytes (rabbit aorta), calcium signalling in sarcoplasmic reticulum, cytoplasm and mitochondria during activation, 339

N

Neutrophil phagosomes, dynamic changes in calcium concentration in, 353
Nitric oxide
effect on endoplasmic reticulum calcium homeostasis, protein synthesis and energy metabolism, 107
modulation of calcium oscillations in pulmonary vascular smooth muscle, 329
simultaneous measurement of intracellular calcium, 281

© Harcourt Publishers Ltd 2000

Norepinephrine, effects on $[Ca^{2+}]_i$ in oscillating/non-oscillating cells, 163
Nucleotide-gated channels (cyclic) in non-sensory organs (Review), 127

P

Pancreatic islet cells
  metabolic, cationic and secretory response to D-glucose, 213
  permeabilized or not with digitonin or α-toxin, mobilization of calcium stores, 43
  (rat) expression of multiple plasma membrane Ca^{2+}-ATPases in, 231
Phagosomes, neutrophil, dynamic changes in calcium concentration in, 353
Plasma membrane, multiple Ca^{2+}-ATPases in pancreatic islet cells, 231
Platelets (bovine), characteristics of collagen-induced calcium mobilization in, 53
Prostate cancer cells, calcium signals in, specific activation by bone-matrix proteins (Review), 35
Protein kinase C, effects on endoplasmic reticulum structure and function in HEK293 cells, 175
Protein synthesis, endoplasmic reticulum, effects of nitric oxide, 107
Pseudoislets, insulin-secreting, synchronization of calcium signals within, 287
Purinergic P_{2X} receptors, activation inhibits P_{2Y}-mediated Ca^{2+} influx in miccroglia, 205
Purinergic responses in HT29 colonic epithelial cells, mediated by G protein α-subunits, 247

R

Ratiometric calcium indicators
  caffeine increases indo-1 fluorescence ratio in a Ca^{2+}-independent manner, 117
  low-affinity (mag-Fura-2, Fura-2FF and BTC), ionic selectivity of, 75
Retinal pigment epithelium, Ca^{2+} uptake, release and ryanodine binding in melanosomes from, 223
Ryanodine binding, in melanosomes from retinal pigment epithelium, 223

S

Salivary gland (blowfly), subcellular organization of calcium waves, 297
Sarcoplasmic reticulum, calcium signalling in, during activation of myocytes, 339
Smooth muscle
  estimate of rapid cytoplasmic calcium buffering in a single cell, 3
  pulmonary vascular, nitric oxide-induced modulation of calcium oscillations in, 329
  tracheal, acetylcholine-induced calcium oscillations in, 153
Sphingosine, effects on calcium mobilization and influx in HL-60 cells, 269
Sympathetic ganglion cells (bullfrog), Ca^{2+}-induced Ca^{2+} release, modes of propagation in, 195

T

T15 cells, inositol polyphosphate binding proteins and Ca^{2+} release in, 15
Testis, cyclic nucleotide-gated channels in (Review), 127
T-lymphoma cells (human), TNFα-induced apoptosis in selective down-regulation of inositol 1,4,5-trisphosphate receptor, 315
TNFα-induced apoptosis, in selective down-regulation of inositol 1,4,5-trisphosphate receptor, 315
α-Toxin, permeabilized pancreatic β-cells, and mobilization of calcium stores, 43
Tracheal smooth muscle, acetylcholine-induced calcium oscillations in, 153

U

UTP response, mediated by G protein α-subunits in colonic cell line HT29, 247

V

Vascular smooth muscle
  nitric oxide-induced modulation of calcium oscillations, 329
